Department of Ecology
1315 West Fourth Avenue
Kennewick, Washington 99336-6018

Mr. Douglas R. Sherwood Hanford Project Manager U.S. Environmental Protection Agency 712 Swift Boulevard, Suite 5 Richland, Washington 99352

Dear Messrs. Jaraysi and Sherwood:

SUBMITTAL OF 218 E-8 BORROW PIT DEMOLITION SITE (218 E-8 DEMOLITION SITE) CLEAN CLOSURE SOIL EVALUATION REPORT (T-2-1)

Please find enclosed the WHC-SD-EN-TI-300, "218 E-8 Demolition Site Clean Closure Soil Evaluation Report, Revision 0," for your information. The 218 E-8 Demolition Site is a treatment unit located in the 200 East Area of the Hanford Site. The 218 E-8 Demolition Site is being closed under the Resource Conservation and Recovery Act. Results from the sampling effort were compared to the Hanford Site background thresholds for soils and the Washington Administrative Code 173-340, "Model Toxics Controls Act Cleanup Regulations," Method B numerical values. No constituents of concern were found in concentrations indicating contamination of the soil by 218 E-8 Demolition Site operations. This determination of no contamination present in the soil will allow this unit to be clean closed.

Messrs. Jaraysi and Sherwood 95-PCA-389

-2-

Should you have questions, please contact Ms. E. M. Mattlin, U.S. Department of Energy, Richland Operations Office, on (509) 376-2385 or Mr. F. A. Ruck III, Westinghouse Hanford Company, on (509) 376-9876.

Sincerely,

James E. Rasmussen, Director Environmental Assurance, Permits, and Policy Division
